

Join Our Elite Medical Team: Critical Care Physician

*Thank you for your interest in joining the **EMS** team. EMS is dedicated to providing the highest standard of pre-hospital and critical care transport.*

At this time, our recruitment for Physicians is temporarily paused as our current team roster is complete.

We appreciate your critical care expertise and encourage you to check back on our careers page for future opportunities.

Critical Care Physician Recruitment

Are you a board-certified physician with extensive experience in critical care, emergency medicine, or anesthesiology, ready to apply your expertise in the dynamic pre-hospital environment?

EMS is actively recruiting **Critical Care Physicians** to join our dedicated team. We seek elite medical professionals who can provide immediate, high-level clinical governance and hands-on patient care in high-acuity scenarios.

Who We Are Looking For

We require physicians with a minimum of **five (5) years** of post-residency experience in one or more of the following specialized areas:

- **Intensive Care Medicine (ICM)**
- **Emergency Medicine (EM)**
- **Anaesthesiology/Critical Care**
- **Trauma Surgery**

Essential Qualifications and Experience

- Current, unrestricted medical license and registration (e.g., GMC, MD).
- Board certification in a relevant specialty (e.g., ABEM, FRCA, etc.).
- Minimum of five (5) years of operational experience post-residency in a high-acuity setting.
- Proven expertise in complex airway management, advanced hemodynamic monitoring, and procedural skills relevant to critical care transport (e.g., chest tubes, central lines).
- ACLS, ATLS, PALS, or equivalent current certifications.
- A strong commitment to clinical education, quality improvement, and inter-professional teamwork.

The Critical Care Physician Role

You will serve as the highest level of medical authority on scene and during transport, responsible for:

- **Clinical Command:** Providing autonomous, on-site medical direction for complex critical care and trauma cases.
- **Direct Patient Care:** Executing advanced medical and surgical interventions in pre-hospital and inter-facility environments.
- **Medical Governance:** Contributing to the development and review of clinical protocols, guidelines, and quality assurance programs.
- **Team Leadership:** Mentoring and providing clinical oversight to paramedic and nursing staff.

Apply Today

Ready to lead clinical excellence in the most challenging environments?

To apply, please submit your detailed Curriculum Vitae (CV) and a cover letter detailing your specific critical care experience, procedural competency, and involvement in medical leadership.

We are an equal opportunity employer.
